

MB3CKV Direct Current Compressor R600a, Medical 12/24V DC

TOOL4COOL

General

| Ceneral | | |
|---------------------------------------|----------------------------|-----------|
| Code number (without electronic unit) | 109M0860 | Approvals |
| Electronic unit - Solar 1 | 101N2742, 40 pcs: 101N2743 | UL / CB |
| Compressors on pallet | 240 | |

Application

| Application range | | LBP/MBP |
|-------------------|-----|--------------------|
| Voltage range | VDC | 9.6 - 17 / 19 - 34 |
| | | |

Cooling requirements

| Application | LBP | MBP |
|--------------------|-----|-----|
| 32°C / 38°C / 43°C | S | S |

Absolute maximum ratings

| Machine compartment temperature or compressor operation | с | -10 to 50 |
|---|------|--------------------------|
| Max. compressor tilt angle for temporary operation | ±30° | |
| Operating pressure range | | see diagram to the right |

Any levels of stress exceeding the absolute maximum value of machine compartment temperature range or operating pressure range or tilt angle may damage the device. Prolonged exposure to stress above the recommended operating conditions may also affect the device's reliability.

Motor

| Motor type | | permanet magnet, brushless DC |
|---|-----|-------------------------------|
| Speed | rpm | variable speed |
| Resistance, each of the three windings (25°C) | Ω | 3.1 |

Design

| Displacement | cm ³ | 2.60 |
|-------------------------------------|-----------------|------------------|
| Oil quantity (type) | cm ³ | 53 (polyolester) |
| Maximum refrigerant charge | g | 70 |
| Free gas volume in compressor | cm ³ | 472 |
| Weight - Compressor/Electronic unit | kg | 1.37 / 0.14 |

Standard battery protection settings

| Voltag | e (0.1 steps) | | | Default | Min. value | Max. value |
|--------|---------------------------|---------------|-----|---------|------------|------------|
| 12V | ± 0.3V DC, all values | Cut out level | VDC | 10.4 | 9.6 | 17 |
| 24V | ± 0.3V DC, all values | Cut out level | VDC | 22.8 | 19 | 32 |
| | Battery cut-in difference | | VDC | 1.3 | 0.5 | 10 |

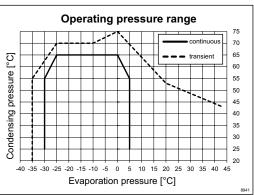

Dimensions

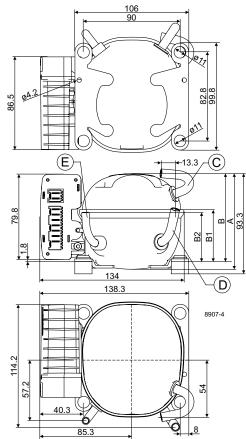

| Height | mm | А | 89.0 |
|--------------------------------------|---------------------------|----|------------------------------|
| | | В | 82.4 |
| | | B1 | 48.7 |
| | | B2 | 45.8 |
| Suction connector | location/I.D. mm angle | С | 6.2 5° |
| | material comment | | Copper Rubber plug |
| Process connector | location/I.D. mm angle | D | 6.2 77.9° |
| | material comment | | Copper Rubber plug |
| Discharge connector | location/I.D. mm angle | Е | 5.0 86.9° |
| | material comment | Cu | u-plated steel Rubber plug |
| Connector tolerance | I.D. mm | = | £0.09, on 5.0 +0.12/+0.20 |
| Remarks: Please follow the brazin | ng instructions on page 3 | | |

⁽Product Bulletin DES.N.101.M).

S Note: In case fan cooling is used: condenser => fan => electronic => compressor

PRODUCT BULLETIN

Brazing on BD Nano Discharge Connector (BDN45F, BDN50K, BDN45F-A, BDN50K-A, MB3CKV, and BDN-EV)

Secop BDN45F/-A, BDN50K/-A, MB3CKV, BDN-EV compressors use a special discharge connector element (see figure 2) that is directly connected to the discharge tube to optimize energy consumption.

This element is made from plastic and sensitive to high heat exposure.

When brazing a tube into the discharge connector (see figure 1) please ensure that the area with the discharge connector element never exceeds 150°C / 302°F.

Don't heat up the bottom of the connector directly.

Use a fork burner (see figure 3) and/or a damp cloth, if necessary. A protective plate can also serve to protect the discharge connector element from direct heat from a flame. Do not braze longer than 10 seconds and wait for 5 minutes for the next soldering attempt.

Further information:

Product Bulletin – Brazing Technique for Compressor Connectors (DES.N.600.A1.02)
