

WITH MORE THAN 60 YEARS OF EXPERIENCE IN COMPRESSOR TECHNOLOGY AND HIGHLY DEDICATED EMPLOYEES, OUR FOCUS IS ON DEVELOPING AND

APPLYING ADVANCED COMPRESSOR TECHNOLOGIES TO ACHIEVE STANDARD SETTING PERFORMANCE FOR LEADING PRODUCTS AND BUSINESSES AROUND THE WORLD.

DESIGNED FOR HARD WORK: NLU-KTK.1 COMPRESSORS

The need for cooling and refrigeration is not limited to markets where power supply is stable and ambient temperatures are below the average body temperature. Sometimes the need might even be bigger in these markets, and that puts a pressure on the refrigerator or freezer.

Our NLU-KTK.1 compressors are specifically designed to operate both in climates where ambient temperature is high and/or in markets where power supply is unstable. The ability to start with a low voltage

power supply and the robustness of the NLU-KTK.1 compressors will secure that the refrigerator or freezer stays cold.

Despite the high robustness of the NLU-KTK.1 compressors, energy efficiency has not been sacrificed. With the highest COP of 1.87/1.46 (ASHRAE/CECOMAF), the NLU-KTK.1 compressors will ensure that our customers are also able to offer cabinets with low energy consumption in markets with high ambient temperatures and unstable power supplies.
