

Secop introduces DLX-KK.1 NLU-KK.1 NLU-KTK.1 High Efficiency Compressors

Secop updates and replaces its DLX-KK, NLU-KK and NLU-KTK compressor ranges to the next generation.

The new generations DLX-KK.1, NLU-KK.1 and NLU-KTK.1 benefit from process and design optimizations.

All compressors deliver the same performance as their predecessors.

Key Benefits

DLX-KK.1 series of household compressors proves to be a significant inclusion to Secop's existing compressor range, covering the entire field of household appliances. The DLX-KK.1 series provides considerable advantages to its users, in particular low noise level.

NLU-KK.1 compressors offer users the possibility to improve their cabinet's energy class, with the smallest possible investment. They have been designed to provide great efficiency which in return instantly improves the efficiency of the entire cabinet.

NLU-KTK.1 compressors are specifically designed to operate both in climates where ambient temperature is high and/or in markets where power supply is unstable. The ability to start with low voltage power supply as well as the robustness of the NLU-KTK.1 compressors, secures that the refrigerator or freezer stays cold.
