

## New Type Labels for K-Series (formerly KAPPA) R600a and R134a Compressors

Secop Group is currently optimizing its footprint in Europe, pooling production and logistics at one location to reap synergies and increase efficiency. Since the beginning of August 2020, Secop has started to relocate its KAPPA compressor production line to its Slovakian plant in Zlaté Moravce.

### Timing

The ramp up of the assembly in Slovakia will start on October 1, 2020 and all K-Series (formerly KAPPA) R600a and R134a compressors will be produced with the new type label.

### Approvals

The type label modification doesn't affect any compressor approval certificates. Figure 1 shows the label as it looks today and figure 2 as it will look after the change. The type label for R134a does not have a warning sign but features a blue area instead.
