

New Type Labels for Selected Compressors

To accomplish the legal request upon our company name change made end of last year, and to avoid any delivery issues with our products, we have begun to change a specific statement on our compressor type labels. This change is only related to some of the specific Secop compressor code numbers listed on page 2. There will be no modifications to the products specification and/or product approbation.

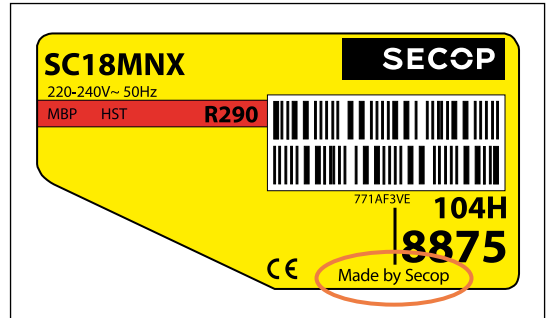

Fig. 1 Old type label "Made by Secop"

Scope and Changes in Compressor Type Labels

The scope of the changes applies to those specific code numbers which include the information "Made by Secop" printed on the type label. The information will change to "Made by Nidec". No other change will be made. The modification doesn't affect VDE, UL, or CCC compressor certificates. For CCC certification, type labels will be updated in the CCC test report. Figure 1 shows an example of our compressor type label as it looks today and figure 2 as it will look after the change.

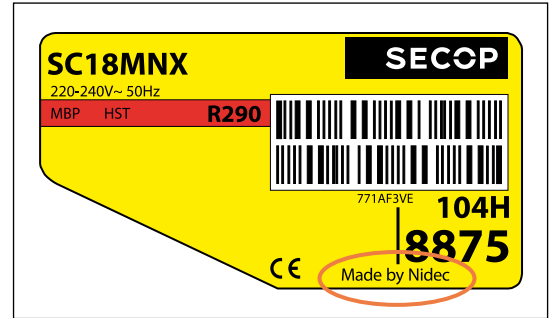

Fig. 2 New type label "Made by Nidec"

Products Affected by the Change

The change does not apply to all compressor code numbers. Check the tables on page 2 for a complete overview of products with the new type label.

Date for the Type Label Change

Starting May 1, 2018, all affected code numbers will be produced with the new type label.

About Nidec Global Appliance (GA) Compressors (formerly Secop)

Nidec Global Appliance (GA) Compressors is a leading compressor manufacturer committed to developing and supporting technologies and products that promote energy efficiency. The company is active in the sectors of household, light commercial, and DC-powered refrigeration and has developed a range of compressors which operate with the use of hydrocarbons, R600a (isobutane) and R290 (propane). Secop, formerly known as Danfoss Compressors, became part of Nidec Corporation in August 2017.
