

Contact Noise Improvement for BD250GH.2 Compressor with 12/24 V DC

We are pleased to announce that Secop will introduce an improved version of BD250GH.2 12/24 V DC compressor for anti-idle comfort cooling in trucks.

The type designation of the new compressor will remain BD250GH.2. All outer dimensions of the compressor will stay the same.

Improvements

The updated BD250GH.2 compressor has been improved in regards to contact noise (when inner parts knock against the compressor shell). The contact noise can occur during driving on harsh road conditions, in mountains, during breaks and hard turns of the truck. A significant reduction of the contact noise has been achieved by means of a redesign of several inner parts on the compressor pump side.

Code numbers

The code numbers will be the same:

Compressor:

BD250GH.2 101Z0406 (150 pcs. on a pallet)

The electronic unit will stay the same:

Electronic Unit:

Single pack: 101N0290

l-pack (36 pcs.): 101N0291

Release date, prices

The compressor is already released. Sales prices will remain the same.
