

UKCA Marking on Secop Products

UKCA (UK Conformity Assessed) is the product marking system intended to replace CE marking for the GB market (England, Wales and Scotland). It was introduced by the UK Government after the end of the EU Exit.

Using the UKCA Marking

“The UKCA marking is a new UK product marking that is used for goods being placed on the market in Great Britain. It covers most goods which previously required the CE marking, known as ‘new approach’ goods.

The UKCA marking came into effect on 1 January 2021. However, to allow businesses time to adjust to the new requirements, you will still be able to use the CE marking until 1 January 2023 in most cases.”

Secop Compressor Type Labels with UKCA Marking

All Secop compressors produced after March first 2022 will comply with the UKCA requirements and will be marked accordingly (see figure 2).

Secop Controller Labels with UKCA Marking

Secop controllers (electronic units) will still be sold with labels containing only the CE marking in 2022. After the stock is depleted within 2022, these labels will also comply with the UKCA requirements and will be marked accordingly (see figure 1).
