

Secop Cord Relief 103N1010 in Colorless Nylon Resin

Due to a temporary (approx. three months) shortage of raw material (nylon resin) Secop has decided to use nylon resin without any color for the standard cord relief 103N1010 (including yoke 103N0126).

Colorless resin has the same characteristics and approvals as our standard (black) nylon resin.

The standard cord relief 103N1010 (including yoke 103N0126), is also available in three packages:

- 103N9103, 80 pcs.
- 103N9109, 100 pcs.
- 103N9106, 125 pcs.

All these will contain the version in colorless resin too.
