

Phase-out of DLV Compressors and Controllers

After many years of the successful introduction to the market, Secop would like to announce that the T-Series platform is scheduled to be discontinued in 2025.

In the past several years the global regulatory environment has significantly raised the bar on efficiency and is driving the introduction of new greener refrigerants. This has brought on a reduction in the consumption of these older compressor families.

The DLV range, which is manufactured on the same T-Series production line, will be discontinued in 2025 as well.

The DLV models will remain in production until December 31, 2025 and will be available for orders until June 30, 2025. Please refer to the table on the right for the complete list of compressors and controller codes affected.

Further Info

For a complete assessment of your needs, we kindly ask you to get in touch with your sales or technical support representative at Secop who are available to assist you during the transition phase.
