

Standard Electronic Unit 101N0212 to be produced in Europe and China

Secop has been selling electronic unit 101N0212 since the end 2014. Until now, it has been produced only in China and the market has responded well to it.

To ensure short lead times and to be as close to our customers as possible, Secop has decided to have the units produced in Europe as well. Besides customer proximity and shorter lead times for European customers, this move also ensures overall deliverability. Additionally, we have responded to the wish of the market to have a second source for such an important part of our product. Electronic units produced in Europe will be available from Secop Slovakia. Presently, no other BD electronic units are planned to be dual sourced.

Differentiation

From a technical point of view, there will be no difference in the units from China or from Europe.

To differentiate the units, the packages have unique logistics order codes.

Units produced in China (package code number)

Single Pack: 101N0212

Industrial Pack: 101N0213

Units produced in Hungary (package code number)

Single Pack: 101N0214

Industrial Pack: 101N0215

All electronic units will be labeled 101N0212 on the pin-out label on the product itself.

Country of origin of individual electronic units

The country of origin can be read from the 2D Barcode label on each electronic unit (Fig.2). Line 1 contains the ID in the following format:

PLYWWsssss (unique number)

Meaning:

PL Production location, 01 ... 99

YY Year, 15 = 2015

WW Week number, 01 ... 52

sssss Serial number, 000001 ... 999999

PL = 10 is produced in Hungary

PL = 11 is produced in China
