

## Colour Change from White to Black on XV Electronic Unit (attached)

Secop is currently in the process of changing the colour of the attached electronic unit housing from white to black.

This change is on all electronic units (attached) models, including 105N502x (XV-AEO/Freq) and customer-specific variants.

The change is only in colour; the material remains the same.

The pictures below show what the change looks like with an industrial package.

Fig. XV compressor with black electronic unit (attached)

## Timing

This change is active as of May 2016.

The detail of the VDE certificate below shows the material characteristic values of both materials.
