

Relays Now Marked with VDE and CQC

Starting now, Secop places the logo of VDE and CQC on the relays starting with the code numbers 117U6... and 117U7... (see figure 3 and 4). This makes it easier to indicate to official authorities that the relays have VDE and CQC approval.

No change in current approvals is necessary.

Relays with the code numbers 117U7020 and 117U6020 will not be changed.

Please get in touch with your local Secop contact person for more information.
