

Starting Relays Type 117U6xxx

During the 4th quarter 2013, Secop will introduce current starting relays (of type 117U6xxx) manufactured in China to supplement the current 117U6xxx range produced by Secop Slovakia.

Consequently in future, Secop customers worldwide could receive 117U6xxx starting relays produced in either China or Slovakia.

Whilst makers marking, assembly date and appearance differ slightly (see Fig.1 and 2), relay quality, function and order code numbers remain the same.

Samples of both Chinese and Slovakian manufactured starting relays can be supplied upon request for customer testing and / or approval.

Both Chinese and Slovakian produced 117U6xxx starting relays carry VDE, CQC and UL approval. Approval certificates can be provided upon request.
